PROFILE

I am a Full Stack development enthusiast, pursuing my B.Tech in ECSC at KIIT University. I have skills in MERN Stack. I also have knowledge in Tailwind CSS, Python and MySQL. I am passionate about crafting engaging and user-friendly interfaces, with knowledge in backend development to deliver comprehensive and seamless solutions.

SKILLS

Programming Language:
JavaScript, TypeScript, Python

Frameworks:
ReactJS, NodeJS, NEXTJS, Vite

Tools:
Git, GitHub, MySQL, Tailwind CSS

Platform:
Windows, Linux, Web

Soft Skills:
Time Management, Communication, Team Work

PROJECTS

Sneaker Selling Website Landing Page: 🔗
This modern website is a landing page for a sneaker selling website. Which enables the brand to easily showcase their product to consumers. This website was made using HTML, CSS and JS.

Doctor's appointment booking website: 🔗
This website is for booking doctor's appointment online. Here we collect patient's information, chosen doctor for checkup etc. I also integrated Appwrite for data collection and storage. This website was made using NEXTJS, ReactJS, TypeScript, Tailwind CSS and NPM packages.

Website for Campsite booking app: 🔗
This website is a landing page for an app which offers camp site booking to its customers. We can see the pictures of the camp, its location etc. This website was built with NEXTJS, ReactJS, TypeScript and TailwindCSS.

Python Ping-Pong Game 🔗
I created a Ping-Pong game using python and pygame library. Ping-Pong is one of the most famous arcade games, simulating table tennis. User can control a side and play against computer bot.
